Activity tracker:

[https://docs.google.com/spreadsheets/d/1k\\_DdcI07JBphozZY25Jxe7VHrcLbBTRGaaPFtW-F99Y/edit#gid=414978427](https://docs.google.com/spreadsheets/d/1k_DdcI07JBphozZY25Jxe7VHrcLbBTRGaaPFtW-F99Y/edit#gid=414978427)

Start: 5:00

Finish: 9:00

## Recap of last week

- HTML and CSS prototype was completed and fixed up
- Thomas and Matthew looked into making a program for transforming images and saving them
- D.2 was a little incomplete, and wrong

## Agenda

- Recap of Past week
- Recap of how they went: all topics above went well
- Fix D.2
- Begin working on D.3
- Plan out and work on Midterm Presentation

## 01. Recap

Deliverables: we talked about how the tasks from last week went and everything we need to fix about them.

## **02. D.2 Redo**

Fix up D.2:

The group went through all the issues we had in D.2 and fixed them all individually for the presentation this upcoming week.

- User Stories
- Use Cases
- Redone drawings so they are all similarly looking
- Edited some of the text that was confusing and made in a rush

## **02. D.3**

Start working on D.3 splitting up tasks, and start working on it.

- Thomas and Matthew worked on the UML Class Diagram
- Aiden started to work on the writing for the paragraphs of D.3 part 1

While doing this, Hunter and Colton worked more on fixing up D.2 so D.3 is correct when writing the paragraphs for the first part. After finishing this they both began working on D.3 in the writing portion of the assignment.

Colton finished his assigned tasks and had to head out earlier than the rest of us as we finished up our part of D.3, we discussed we would assign work later through either the group chat or the microsoft teams.

## **03. Work on and Plan out Presentation**

Plan out and read what is required to complete the presentation

- Decide who is going to make what slides
- Talk about the design itself of the presentation

## **X. Retrospective**

(i) Appreciations:

Appreciations to Aiden who worked really hard on the website this weekend getting it turned into a React app and fixing up some of the HTML

(ii) Successes:

Some of the successes this week was getting a huge amount of actual code done

(iii) What didn't go so well:

We were unable to hold our normal meeting on Thursday so we had to rush to get D.3 done on time and still have it be good quality.

(iv) Barriers:

Scheduling for this week, with everyone having a lot of work to do and things to go to.

(v) What we should try next time:

Practice the presentation, in a meeting separate from our normal meeting. Try not to hold our meeting on Sunday, if we can have a meeting on Thursday have the meeting BEFORE Thursday.

## Y. Planning of the next steps

### Goals for next week summarized

- Hunter: Work on presentation
- Thomas: Continue working on the program to create templates
- Matthew : Continue working on the program to create templates; work on the formatting and layout of the presentation.
- Aiden : Work on presentation, finish changing to react
- Colton : Work on presentation

Week 6								
Meeting 6 ( Hunter, Matthew, Aiden)		6		All		5	5	Done
Transition website to react	Design	6		Aiden		3		Ongoing
Put website up fully on AWS	Design	6		Thomas		1		Ongoing
Create Presentation	Documentation	6		All		3		Ongoing
