Minutes for group meeting 2

Group 05 – "MultiPixel"

Date and location: 2/8/24 ONline

Present participants: Aidan Trujillo, Thomas Rotchford, Hunter Beach, Matthew Gardner, Colton Leighton

Missing participants: none

Facilitator: Hunter Beach

Archivist: Aidan Trujillo

Scrum Master: Thomas

Project repo: https://github.com/thomasrotchford/CS386-2024-multiPainter/

Activity Tracker:
https://docs.google.com/spreadsheets/d/1k_Ddci07JBphozZY25Jxe7VHrcLbBTRGaaPFtW-F99Y/edit#gid=877942987

Start: 3:30

Finish:

Proposed Agenda

1.)Summary

        Recap last weeks tasks

- Matthew looked at docker, and he looked at AWS and realized we might not need docker

- We just need to have a container

2.)Project Planning

        How did interviews go?

Aidan's – Doesn't need multiplayer

- Chill and relaxing
- Would play during class
- Doesn't need music because during class or listen to own music
- Leader board would give a reason to go back
- Voting would be cool if you have a free paint mode.

Thomas' – Oh yeah I would check It out if you showed me but I wouldn't play it.

- Music like music from stardew valley

(Aidan) What AWS do we should we use

- AWS website tutorials
- Everything is free tier
- The things we need are about 3 different servers and set up is 35 min
- https://aws.amazon.com/getting-started/hands-on/build-web-app-s3-lambda-api-gateway-dynamodb/

(Thomas) Art examples

- A few art examples made from pixels. They have specific pallettes.
- They are in the github.
- We need a way to convert pngs to pixel related images.

(Hunter) Html

- There were audio issues, we were unable to get clear updates

(Colton) Flask

- Unable to review flask this week
- Will not have need for it this week.

3.) New activities

Everyone need their own clone of the repo and their own branch

- Needs to get this done before any commits

We gotta figure out frameworks and database and stuff

- This should be all laid in AWS

(i) Appreciations: Getting a service for our website and getting the majority of our interviews done.

(ii) Successes: Finally have a solid foundation of what to use for our website

(iv) Barriers: Hunter had a hard time being here. The snow was a big factor in this and his car was getting stuck.

(v) What we should try next time: Being in the library again.

3. [Include here the other items that need discussion]

 D1

- Everyone does their own interviews for the interview section
- Value Proposition
  - Thomas and Colton Final value proposition
  - Hunter and Aidan Initial Value proposition and customer segments

- Matthew for the Introduction

4. Planning

This weekend we need a website up. Saturday 2/10

- Goal is to do this Friday 2/9

Purchase a domain name.

- Matthew will buy the domain name

Things that are due

- D1 Sunday 11:59
- Everyone going through amazon web services training Sunday 11:59
- Peer Eval due Sunday 11:59

Get your own branch
