1. Summary of activities

1.1 Deliverables

Last week, we worked on D.1. We conducted 8 interviews and wrote sections 1 to 3 of the deliverable. We got it turned in on time and we found out we need to use a md generator.

1.2 Code

We implemented the following features and fixed the following bugs:

- Have multiple AWS websites working, one as a react app and one as a regular hosted website.
- Front end is coming along nicely

2. Retrospective

(i) Appreciations:

- We have something online.

(ii) Successes:

- 29/30 on D1

(iii) What didn't go so well:

- We don't have a backend.

(iv) Barriers:

- Not knowing AWS

(v) What we should try next time:

- React

3. [Include here the other items that need discussion]

- Which AWS website will we run with?
  - Both for a little longer? AWS
- D.2
  - Work through (at least outline) 3-5
  - Make a Use Case Diagram together on 6
  - Make Issues for Use Cases and User Stories
  - Assign anything that needs to be done
